

## Postdoctoral Position in Biophysics and Mechanobiology

The Mak Research Lab in the Biomedical Engineering Department at Yale University has an opening for a postdoctoral position. The lab is focused on multiscale biophysics in disease and developmental processes, from molecular to multicellular levels, with an emphasis on integrated approaches involving physiologically mimicking experimental systems, microfluidics, and computational modeling. More information can be found at [www.MakResearchLab.com](http://www.MakResearchLab.com). Candidates should have expertise in one or more of the following areas:

- 1) mechanobiology, cell biophysics
- 2) 3D tissue culture systems, extracellular matrix
- 3) microfluidics, microfabrication
- 4) computational modeling

Interested postdoctoral candidates should email Michael Mak, Ph.D. ([Michael.Mak@Yale.edu](mailto:Michael.Mak@Yale.edu)) with a cover letter, CV, and contact information of three references.
